

ADMINISTRATION

Councils and Committees

The Board of Education or Superintendent of Schools may elect from time to time to form councils or committees. The function of these councils or committees will be specific in nature and their purpose will be clearly defined in their charge. All councils or committees are dissolved once their objective has been achieved and a final report has been made to the Superintendent or Board of Education. Councils and committees are advisory and their recommendations will require formal action by the Superintendent or Board of Education.
